

a

	Nothing held out	Each of the 12 largest assay campaigns	All CYP-panel screens (4,161 edges)
Synthesis of EET and DHET	q = 0.033	kept in 12 of 12	not testable
Synthesis of 16-20-HETE	q = 0.033	kept in 12 of 12	not testable
Biosynthesis of maresin-like SPMs	q = 0.033	lost without AID2284394 (q 0.093) or AID2283485 (q 0.086)	q = 0.299
	still released	no longer released	its proteins leave the background

c

d

	plaus- ible	depends on I_u	implaus- ible
● A Mechanism robustness run on real data (panel a)	0	28	100
● B Exposure-constrained mechanism run on real data (panel c)	0	22	106
✕ C Cell context and direction not started			
● D Formula vs monomer run on real data (panel b)	0	22	106
□ E Combination analysis implemented and tested	0	22	106
□ F Preparation and batch records in place			
□ G Response heterogeneity analysis implemented and tested			
○ H Benefit vs toxicity partly
