
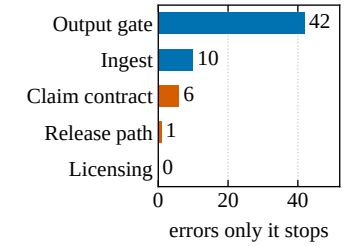
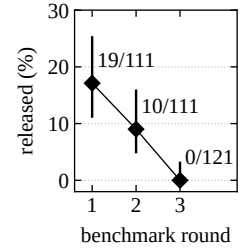
(a) Errors released by configuration



(b) Errors one gate alone stops

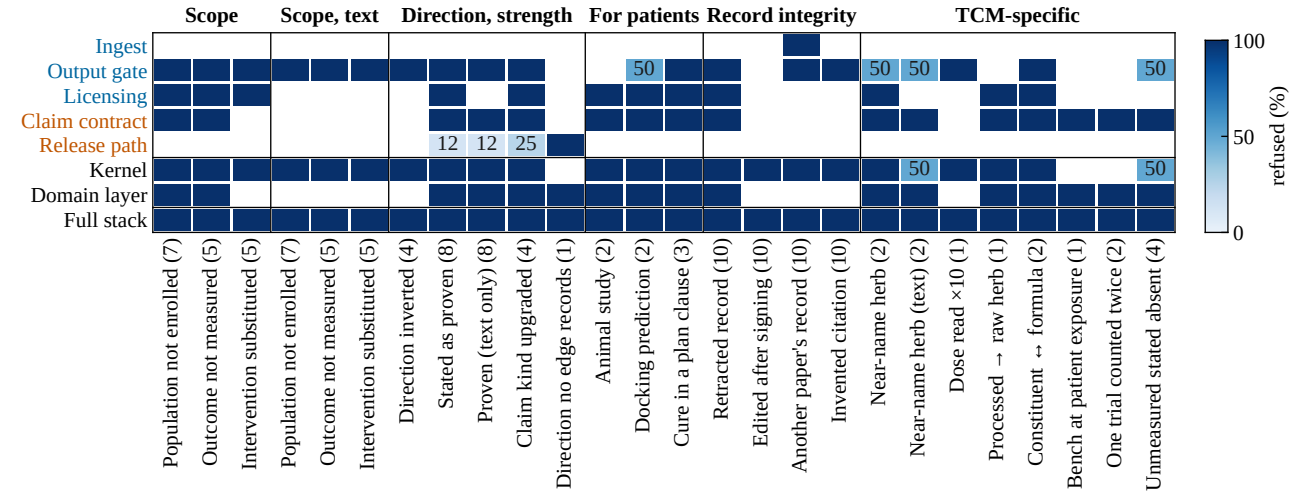


(c) Full stack, by round

Key to (a)

- ● one gate
- ■ one layer
- ▲ all but one gate
- ◆ all five gates
- kernel gates (PSH)
- domain-layer gates

bars, 95% Wilson intervals; n = 121 mutants per configuration



(d) Share of each error class's mutants refused, by gate, by layer and by the full stack
